Objective

Detail-oriented engineering student with strong analytical and programming skills, looking for an entry-level position to enhance practical knowledge. Committed to delivering innovative solutions and continuous improvement.

Education

- SRI REVANNA SIDDESHWARA INSTITUTE OF TECHNOLOGY** 2023
CSE
8.5
- GOVERNMENT BOYS PRE UNIVERSITY COLLEGE** 2023
PUC
73%
- SEVA SADANA HIGH SCHOOL** 2021
SSLC
73%

Projects

- AI Virtual Mouse using OpenCV**
Developed a virtual mouse system using computer vision techniques where hand gestures are captured through a webcam and used to control cursor movements without a physical mouse.

Implemented real-time hand tracking using OpenCV and mediapipe to detect finger positions and gestures for performing actions like click, scroll, and drag.

Designed gesture-based controls such as index finger movement for cursor control and finger combinations for left-click and right-click operations.

Improved user interaction by enabling touchless control, making it useful for applications like presentations, accessibility systems, and smart environments.
- AI-Driven Customer Intelligence System**
Developed a customer segmentation system using unsupervised learning

Applied algorithms like K-Means, DBSCAN, Hierarchical Clustering, and GMM

Performed feature engineering using RFM model and behavioral metrics

Evaluated models using Silhouette Score and Davies-Bouldin Index

Generated business insights for customer retention and marketing strategies

Interests

- Learning some new skills related to AI
- Building some interesting projects

Languages

- KANNADA
- ENGLISH
- SANSKRIT

SOFT SKILLS

- Communication Skills
- Team Collaboration
- Time Management
- Quick Learning Ability

TECHNICAL SKILLS

- Programming Languages: Python, C, Java (Basics)
- Tools & Technologies: Jupyter Notebook, VS Code, Git, GitHub
- Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
- Concepts: Machine Learning, Data Analysis, Data Preprocessing
- Database: MySQL (Basic)
- Computer vision
- AI & ML
